Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine)

Robert A. Aronowitz

Making Sense of Illness is a fascinating investigation into the social and clinical factors that determine what constitutes a "legitimate" illness in the twentieth century. By examining six case studies of diseases that have emerged within the past fifty years--from what we now consider to be "straightforward" diseases such as coronary heart disease, to the currently widely-debated Chronic Fatigue Syndrome--Aronowitz examines the historical and cultural factors that influence how doctors think about illness; how illnesses are recognized, named, classified, and finally, what they "mean" in an individual and social context. The choices that are available to the investigators, clinicians, patients and the processes by which change occurs are factors that all play a great role in "legitimizing" an illness, and these are the roles that are seldom examined. By juxtaposing the histories of each disease, Aronowitz shows how cultural and historical precedents have determined research programs, public health activities, clinical decisions, and even the patient's experience of illness. This is a must-read for anyone interested in public health and the history of medicine in the United States.

From reader reviews:

Robert Bell:

Information is provisions for individuals to get better life, information currently can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is inside the former life are difficult to be find than now could be taking seriously which one works to believe or which one the actual resource are convinced. If you obtain the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine) as the daily resource information.

Sheldon McLean:

People live in this new day time of lifestyle always make an effort to and must have the time or they will get large amount of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not really a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, the particular book you have read will be Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine).

Ruth Michel:

Your reading 6th sense will not betray you, why because this Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine) reserve written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written in good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still skepticism Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine) as good book not just by the cover but also from the content. This is one guide that can break don't evaluate book by its handle, so do you still needing one more sixth sense to pick that!?! Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Florinda Redfern:

Are you kind of busy person, only have 10 or perhaps 15 minute in your morning to upgrading your mind expertise or thinking skill also analytical thinking? Then you have problem with the book than can satisfy your short space of time to read it because this time you only find reserve that need more time to be study. Making Sense of Illness: Science, Society and Disease (Cambridge Studies in the History of Medicine) can be your answer because it can be read by anyone who have those short free time problems.
