Classical and Quantum Cosmology (Graduate Texts in Physics)

Gianluca Calcagni

Classical and Quantum Cosmology (Graduate Texts in Physics) Gianluca Calcagni

This comprehensive textbook is devoted to classical and quantum cosmology, with particular emphasis on modern approaches to quantum gravity and string theory and on their observational imprint. It covers major challenges in theoretical physics such as the big bang and the cosmological constant problem. An extensive review of standard cosmology, the cosmic microwave background, inflation and dark energy sets the scene for the phenomenological application of all the main quantum-gravity and string-theory models of cosmology.

Born of the author's teaching experience and commitment to bridging the gap between cosmologists and theoreticians working beyond the established laws of particle physics and general relativity, this is a unique text where quantum-gravity approaches and string theory are treated on an equal footing. As well as introducing cosmology to undergraduate and graduate students with its pedagogical presentation and the help of 45 solved exercises, this book, which includes an ambitious bibliography of about 3500 items, will serve as a valuable reference for lecturers and researchers.

From reader reviews:

Betty Terry:

The book Classical and Quantum Cosmology (Graduate Texts in Physics) give you a sense of feeling enjoy for your spare time. You can utilize to make your capable much more increase. Book can to be your best friend when you getting pressure or having big problem using your subject. If you can make reading a book Classical and Quantum Cosmology (Graduate Texts in Physics) for being your habit, you can get considerably more advantages, like add your capable, increase your knowledge about many or all subjects. It is possible to know everything if you like wide open and read a reserve Classical and Quantum Cosmology (Graduate Texts in Physics). Kinds of book are a lot of. It means that, science book or encyclopedia or other folks. So , how do you think about this reserve?

Ernestine Worrell:

The book with title Classical and Quantum Cosmology (Graduate Texts in Physics) contains a lot of information that you can discover it. You can get a lot of benefit after read this book. This specific book exist new knowledge the information that exist in this guide represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This book will bring you within new era of the globalization. You can read the e-book in your smart phone, so you can read it anywhere you want.

Charles Buffington:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many query for the book? But any kind of people feel that they enjoy to get reading. Some people likes looking at, not only science book but also novel and Classical and Quantum Cosmology (Graduate Texts in Physics) or perhaps others sources were given information for you. After you know how the truly amazing a book, you feel want to read more and more. Science book was created for teacher or even students especially. Those publications are helping them to put their knowledge. In other case, beside science publication, any other book likes Classical and Quantum Cosmology (Graduate Texts in Physics) to make your spare time much more colorful. Many types of book like here.

Carolyn Hoar:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is composed or printed or descriptive from each source this filled update of news. Within this modern era like now, many ways to get information are available for a person. From media social like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just seeking the Classical and Quantum Cosmology (Graduate Texts in Physics) when you necessary it?
