Flourishing and Happiness in a Free Society: Toward a Synthesis of Aristotelianism, Austrian Economics, and Ayn Rand's Objectivism Edward W. Younkins

This book provides a framework for a potential paradigm of human flourishing and happiness in a free society. It is an exploratory attempt to construct an understanding from various disciplines and to integrate them into a clear, consistent, coherent, and systematic whole. Holding that there are essential interconnections among objective ideas, the book emphasizes the compatibility of Aristotelianism, Austrian economics, and Ayn Rand's Objectivism. It argues that particular ideas from these areas can be integrated into a paradigm of human flourishing and happiness based on the nature of man and the world. Such a paradigm will help people to understand the world and to survive and flourish in it.
