## **Dimensional Analysis and Intelligent Experimentation** Andrew C Palmer

“Andrew Palmer presents a well-informed and detailed book built on examples from a wide variety of backgrounds . . . This book is a valuable read for students wishing to gain more from dimensional, and others who are concerned with designing intelligent experiments based on dimensional analysis.” Assembly Automation Industrial Robot Sensor Review Dimensional analysis is a magical way of finding useful results with almost no effort. It makes it possible to bring together the results of experiments and computations in a concise but exact form, so that they can be used efficiently and economically to make predictions. It takes advantage of the fact that phenomena go their way independently of the units we measure them with, because the units have nothing to do with the underlying physics. This simple idea turns out to be unexpectedly powerful. Students often fail to gain from dimensional analysis, because bad teaching has led them to suppose it cannot be used to derive new results, and can only confirm results that have been secured by some other route. That notion is false. This book demonstrates what can be done with dimensional analysis through a series of examples, starting with Pythagoras' theorem and the simple pendulum, and going on to a number of practical examples, many from the author's experience in ocean engineering. In parallel, the book explains the underlying theory, starting with Vaschy's elegant treatment, whilst avoiding unnecessary complexity. It also explores the use and misuse of models, which can be useful but can also be seriously misleading.

### **From reader reviews:**

#### **Dorothy Wright:**

Reading a reserve can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a book will give you a lot of new facts. When you read a reserve you will get new information since book is one of various ways to share the information as well as their idea. Second, reading through a book will make an individual more imaginative. When you reading through a book especially fictional book the author will bring that you imagine the story how the character types do it anything. Third, you are able to share your knowledge to other individuals. When you read this Dimensional Analysis and Intelligent Experimentation, you could tells your family, friends and soon about yours e-book. Your knowledge can inspire others, make them reading a e-book.

#### **James Babb:**

The book Dimensional Analysis and Intelligent Experimentation has a lot of information on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. The author makes some research previous to write this book. That book very easy to read you can find the point easily after reading this book.

#### **Barbra Poole:**

Do you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work at this point is difficult job because you are afraid that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer may be Dimensional Analysis and Intelligent Experimentation why because the amazing cover that make you consider with regards to the content will not disappoint a person. The inside or content is actually fantastic as the outside as well as cover. Your reading sixth sense will directly make suggestions to pick up this book.

#### **Ina French:**

With this era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you should do is just spending your time not very much but quite enough to enjoy a look at some books. One of many books in the top record in your reading list will be Dimensional Analysis and Intelligent Experimentation. This book which is qualified as The Hungry Hills can get you closer in getting precious person. By looking upwards and review this reserve you can get many advantages.
