Flight Engineer for Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series)

Federal Aviation Administration

The 'Practical Test Standards' (PTS) series guides student pilots, flight instructors, and FAA-designated examiners through checkrides, the final test in acquiring a pilot license. Each PTS guide details the skill and knowledge that must be successfully demonstrated before an examiner can issue a certificate or rating. The knowledge requirements detail which subjects will be covered -- which weather reports and forecasts candidates will be asked to analyse, which physiological conditions (such as dehydration, spatial disorientation, and hypoxia) candidates will need to discuss, and what kind of flight planning exercises will need to be demonstrated. The skill requirements include what kind of takeoff and landing must be performed, such as crosswind or short-field; how a steep turn should be executed, with specifics that include what bank angle and airspeed to use; and what areas will be tested on a continuous basis, such as the checklist usage, positive exchange of flight controls, and crew resource management. The tolerances are defined so the candidates know what altitude, airspeed, headings, and banks must be maintained to complete each manoeuvre successfully. Each PTS guide lists the knowledge and experience prerequisites for a particular certificate or rating and provides background information and study and reference materials.

From reader reviews:

Charles Tapia:

Reading a e-book can be one of a lot of task that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new data. When you read a book you will get new information since book is one of several ways to share the information or even their idea. Second, looking at a book will make anyone more imaginative. When you reading a book especially fictional book the author will bring you to definitely imagine the story how the characters do it anything. Third, you are able to share your knowledge to some others. When you read this Flight Engineer for Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series), you could tells your family, friends along with soon about yours e-book. Your knowledge can inspire different ones, make them reading a book.

Graciela Tubbs:

Reading can called imagination hangout, why? Because if you are reading a book specially book entitled Flight Engineer for Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series) your mind will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely will become your mind friends. Imaging just about every word written in a guide then become one web form conclusion and explanation which maybe you never get prior to. The Flight Engineer for Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series) giving you a different experience more than blown away your head but also giving you useful details for your better life in this era. So now let us show you the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Peggy Nunes:

Reading a book for being new life style in this 12 months; every people loves to examine a book. When you go through a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, along with soon. The Flight Engineer for Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series) offer you a new experience in examining a book.

Farah McCune:

Many people spending their time frame by playing outside using friends, fun activity using family or just watching TV all day every day. You can have new activity to spend your whole day by examining a book. Ugh, you think reading a book really can hard because you have to accept the book everywhere? It alright you can have the e-book, having everywhere you want in your Smartphone. Like Flight Engineer for

Reciprocating, Turboprop & Turbojet Aircraft (Practical Test Standards Series) which is finding the e-book version. So , why not try out this book? Let's view.
