## Advanced Intraoperative Technologies in Neurosurgery

Since the introduction of electrosurgery the techniques of surgery on the nervous system have passed through further improvements (bipolar coagulation, microscope), even if the procedure was not substantially modified. Today, laser represents a new "discipline", as it offers a new way of performing all basic maneuvers (dissection, demolition, hemostasis, vessel sutures). Furthermore, laser offers the possibility of a special maneuver, namely reduction of the volume of a tumoral mass through vaporization. Its application is not restricted to traditional neurosurgery but extends also to stereotactic and vascular neurosurgery. Laser surgery has also influenced the anesthesiologic techniques. At the same time new instrumentation has been introduced: CUSA ultrasonic aspiration, echotomography, and Doppler flowmeter. I have had the chance to utilize these new technologies all at a time and have come to the conclusion that we are facing the dawn of a new methodology which has already shown its validity and lack of inconveniences, and whose object is to increase the precision of neurological surgery. The technological development is still going on, and some improvements are to be foreseen. Laser scalpel is splitting the initial laser surgery into NO TOUCH and TOUCH surgery with laser. As new instrumentarium will be developed, a variable and tunable beam will become available. For example, in a few years Free Electron Laser will further add to the progress in this field.

### From reader reviews:

#### **James Nadler:**

The e-book with title Advanced Intraoperative Technologies in Neurosurgery possesses a lot of information that you can study it. You can get a lot of advantage after read this book. This specific book exist new knowledge the information that exist in this reserve represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This book will bring you within new era of the the positive effect. You can read the e-book in your smart phone, so you can read this anywhere you want.

#### **Bradley Simpson:**

Advanced Intraoperative Technologies in Neurosurgery can be one of your starter books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to put every word into delight arrangement in writing Advanced Intraoperative Technologies in Neurosurgery although doesn't forget the main point, giving the reader the hottest as well as based confirm resource details that maybe you can be certainly one of it. This great information could drawn you into new stage of crucial pondering.

#### **Tom Johnson:**

That reserve can make you to feel relax. This book Advanced Intraoperative Technologies in Neurosurgery was colourful and of course has pictures around. As we know that book Advanced Intraoperative Technologies in Neurosurgery has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore not at all of book are make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading that.

#### **Rick Braden:**

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Advanced Intraoperative Technologies in Neurosurgery can make you feel more interested to read.
