Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering) Rongfang Liu

A comprehensive discussion of automated transit

This book analyzes the successful implementations of automated transit in various international locations, such as Paris, Toronto, London, and Kuala Lumpur, and investigates the apparent lack of automated transit applications in the urban environment in the United States.

The book begins with a brief definition of automated transit and its historical development. After a thorough description of the technical specifications, the author highlights a few applications from each sub-group of the automated transit spectrum. International case studies display various technologies and their applications, and identify vital factors that affect each system and performance evaluations of existing applications. The book then discusses the planning and operation of automated transit applications at both macro and micro levels. Finally, the book covers a number of less successful concepts, as well as the lessons learned, allowing readers to gain a comprehensive understanding of the topic.

Key features:

- Provides a thorough examination of automated transit applications, their impact and implications for
- Written by the committee chair for the Automated Transit Systems Transportation, Research Board
- Offers essential information on planning, costs, and applications of automated transit systems
- Covers driverless metros, automated LRT, group and personal rapid transit, a review of worldwide applications
- Includes capacity and safety guidelines, as well as vehicles, propulsion, and communication and control systems

This book is essential reading for engineers, researchers, scientists, college or graduate students who work in transportation planning, engineering, operation and management fields.

From reader reviews:

Mary Hubbard:

Have you spare time for just a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the actual Mall. How about open or perhaps read a book eligible Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering)? Maybe it is being best activity for you. You realize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with the opinion or you have different opinion?

Jordan Moore:

The book Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering) make you feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can being your best friend when you getting strain or having big problem along with your subject. If you can make looking at a book Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering) being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You could know everything if you like start and read a guide Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So, how do you think about this reserve?

Mark Mata:

What do you think about book? It is just for students since they're still students or the item for all people in the world, the actual best subject for that? Just simply you can be answered for that issue above. Every person has several personality and hobby for every single other. Don't to be pressured someone or something that they don't need do that. You must know how great and also important the book Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering). All type of book is it possible to see on many sources. You can look for the internet options or other social media.

Danilo Ernest:

As people who live in often the modest era should be change about what going on or info even knowledge to make all of them keep up with the era that is always change and move ahead. Some of you maybe may update themselves by looking at books. It is a good choice for yourself but the problems coming to you actually is you don't know which one you should start with. This Automated Transit: Planning, Operation, and Applications (IEEE Press Series on Systems Science and Engineering) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.
