The Education of Children Alfred Adler

Originally published in 1930, this title looks at the education of children. Adler believes the problems from a psychological point of view are the same as for adults, that of self-knowledge and rational self-direction. However, the difference being that due to the 'immaturity of children, the question of guidance – never wholly absent in the case of adults – takes on supreme importance.' The title starts by presenting the Individual Psychology viewpoint as a whole, with the later chapters undertaking to tackle in more depth the various interrelated problems of children's education.
