Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP Communications (Paperback)) James F. Durkin

Assist Telco and ISP engineers and technicians in their transition to IP telephony

- Assists traditional telco engineers and technicians in designing, implementing, and supporting VoIP networks
- Provides a step-by-step approach to designing a VoIP network
- Outlines each VoIP technology components with detailed descriptions of possible applications
- Provides a thorough description of Voice over IP for those new to the technology

Voice over IP (VoIP) is a fast-growing technology within telcos and ISPs. VoIP is significantly reducing the cost of transmitting telephone calls and enabling small companies to enter the +\$50 billion marketplace. Many telcos and ISPs are entering this market while VoIP is still in its infancy. As a result, there is an urgent need for telco and ISP engineers to learn this new technology. This book will assist telco engineers to transition to IP networking with a focus on VoIP networks. This book introduces the fundamentals of IP networking as it applies to transmitting voice calls using IP packets. Key telco-based technologies such as SS7 are reviewed. A unique approach is that the book outlines each component of VoIP technology while describing the application of the technology. This is accomplished by describing key steps in designing an operational VoIP network, thereby enabling the reader to understand how this technology is applied.

From reader reviews:

Kenneth Tillman:

In this 21st centuries, people become competitive in each way. By being competitive today, people have do something to make these people survives, being in the middle of the crowded place and notice through surrounding. One thing that occasionally many people have underestimated this for a while is reading. Sure, by reading a e-book your ability to survive increase then having chance to endure than other is high. For yourself who want to start reading some sort of book, we give you that Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP Communications (Paperback)) book as starter and daily reading publication. Why, because this book is greater than just a book.

Nikki Jones:

Precisely why? Because this Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP Communications (Paperback)) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will surprise you with the secret the item inside. Reading this book beside it was fantastic author who else write the book in such incredible way makes the content within easier to understand, entertaining means but still convey the meaning totally. So , it is good for you for not hesitating having this any more or you going to regret it. This amazing book will give you a lot of gains than the other book have such as help improving your skill and your critical thinking means. So , still want to hesitate having that book? If I were you I will go to the reserve store hurriedly.

Timothy Lumpkin:

That reserve can make you to feel relax. This specific book Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP Communications (Paperback)) was vibrant and of course has pictures around. As we know that book Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP Communications (Paperback)) has many kinds or genre. Start from kids until teenagers. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading in which.

Barbara Roundtree:

As a pupil exactly feel bored to reading. If their teacher inquired them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's spirit or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Voice-Enabling the Data Network: H.323, MGCP, SIP, QoS, SLAs, and Security (paperback) (IP

Communications (Paperback)) can make you experience more interested to read.
