Today, most competition cars have at least some components made from composite materials. Fully updated to include the latest developments in material and techniques, this book explains how to exploit composites technology in the home workshop. It covers all the main materials and methods, from 'wet lay-up' glass fiber to pre-preg carbon fiber, together with core materials and resin systems. The extensively illustrated, down-to-earth text will appeal to anyone who builds, repairs or develops competition cars or components, as well as to motorsport enthusiasts who seek a better understanding of composite materials.
