Sky Curtis has helped many people become well from intestinal disorders. After extensive research, she created the first successful fecal transplant home protocol for Crohn's Disease to heal her son from this crippling illness. This inspirational story of creativity and courage is told in *A GUT REACTION*, published by Inanna Publications. World-wide medical trials and case studies are now providing evidence that fecal transplants treat many intestinal diseases including potentially fatal *C. difficile* infections. *THE FECAL TRANSPLANT GUIDEBOOK* offers new hope to all people who suffer from an intestinal disorder. Its home-based protocols provide an excellent alternative to unsuccessful diets, dangerous medications, aggressive surgery, and even death. Fecal transplants are simple and effective. They are the process of safely transferring the healthy bacterial flora in the stool of a well person into the intestines of an ill person, thereby restoring a healthy balance of bacteria. The rampant bacteria causing the illness is crowded out and fought off by the bacteria from a healthy person. *THE FECAL TRANSPLANT GUIDEBOOK* has easy step-by-step directions for treating many intestinal problems. Sky Curtis's well-tested various home protocols have a very high success rate for treating Crohn's Disease, Ulcerative Colitis, *C. difficile*, Irritable Bowel Disease, constipation, diarrhea, and other intestinal issues including those caused by antibiotics and chemotherapy.
