Innovative Accreditation Standards in Education and Training: The Italian Experience in Ethical Standards and the Impact on Business Organisation Pietro Previtali

The aim of this book is to examine how technical and institutional factors affect the responsiveness of public and private organisations to a change in accreditation standards, with specific reference to the vocational educational and training (VET) sector and ethical standards. In particular, the authors analyse the Italian experience regarding a new accreditation standard recently adopted in the Region of Lombardy. Although based on a national experience, this innovative approach to accreditation systems in the educational sector provides a more general framework of analysis of how ethics and compliance can be applied in business organisation worldwide.
