Practical Graph Analytics with Apache Giraph Roman Shaposhnik, Claudio Martella, Dionysios Logothetis

Practical Graph Analytics with Apache Giraph helps you build data mining and machine learning applications using the Apache Foundation's Giraph framework for graph processing. This is the same framework as used by Facebook, Google, and other social media analytics operations to derive business value from vast amounts of interconnected data points.

Graphs arise in a wealth of data scenarios and describe the connections that are naturally formed in both digital and real worlds. Examples of such connections abound in online social networks such as Facebook and Twitter, among users who rate movies from services like Netflix and Amazon Prime, and are useful even in the context of biological networks for scientific research. Whether in the context of business or science, viewing data as connected adds value by increasing the amount of information available to be drawn from that data and put to use in generating new revenue or scientific opportunities.

Apache Giraph offers a simple yet flexible programming model targeted to graph algorithms and designed to scale easily to accommodate massive amounts of data. Originally developed at Yahoo!, Giraph is now a top top-level project at the Apache Foundation, and it enlists contributors from companies such as Facebook, LinkedIn, and Twitter. *Practical Graph Analytics with Apache Giraph* brings the power of Apache Giraph to you, showing how to harness the power of graph processing for your own data by building sophisticated graph analytics applications using the very same framework that is relied upon by some of the largest players in the industry today.

From reader reviews:

Donna Hubbard:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The data you get based on what kind of guide you read, if you want send more knowledge just go with training books but if you want experience happy read one using theme for entertaining for instance comic or novel. Often the Practical Graph Analytics with Apache Giraph is kind of guide which is giving the reader unstable experience.

Brandy Anderson:

Information is provisions for people to get better life, information nowadays can get by anyone from everywhere. The information can be a information or any news even a problem. What people must be consider if those information which is inside former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Practical Graph Analytics with Apache Giraph as your daily resource information.

Richard Harden:

Does one one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you just dont know the inside because don't judge book by its handle may doesn't work here is difficult job because you are afraid that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer may be Practical Graph Analytics with Apache Giraph why because the wonderful cover that make you consider about the content will not disappoint you actually. The inside or content is actually fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

Oscar Barr:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your short period of time to read it because pretty much everything time you only find reserve that need more time to be read. Practical Graph Analytics with Apache Giraph can be your answer mainly because it can be read by you who have those short spare time problems.
