Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 K. H. Head

This volume, the first in a set of three, is a vital working manual which covers the basic tests for the classification and compaction characteristics of engineering soils. It will therefore be an essential practical handbook for all engaged on the testing of soils in a laboratory for building and civil engineering purposes. Based on the author's experience over many years managing large soil testing laboratories, particular emphasis has been placed on ensuring that procedures are fully understood. Each test procedure has therefore been broken down into simple stages with each step being clearly described. The use of flow diagrams and the setting out of test data and calculations will be of great benefit, especially for the newcomer to soil testing. The book is complemented with many numerical examples which illustrate the methods of calculation and graphical presentations of typical results. The reporting of test data is also explained. Vital information on good techniques, laboratory safety, the calibration of measuring instruments, essential checks on equipment, and laboratory accreditation are all included. A basic knowledge of mathematics, physics and chemistry is assumed but some of the fundamental principles that are essential in soil testing are explained where appropriate.

From reader reviews:

Michael Colburn:

Book is usually written, printed, or highlighted for everything. You can understand everything you want by a e-book. Book has a different type. As you may know that book is important factor to bring us around the world. Next to that you can your reading expertise was fluently. A guide Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 will make you to be smarter. You can feel much more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It is far from make you fun. Why they are often thought like that? Have you seeking best book or acceptable book with you?

Carissa Taylor:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work at this point is difficult job because you are scared that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer could be Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 why because the fantastic cover that make you consider about the content will not disappoint a person. The inside or content is actually fantastic as the outside as well as cover. Your reading sixth sense will directly make suggestions to pick up this book.

Nyla Gomez:

In this period globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The book that recommended to your account is Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 this guide consist a lot of the information in the condition of this world now. That book was represented how can the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The particular writer made some exploration when he makes this book. Honestly, that is why this book suited all of you.

Scott Croft:

Some individuals said that they feel bored stiff when they reading a e-book. They are directly felt the item when they get a half areas of the book. You can choose the particular book Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 to make your current reading is interesting. Your skill of reading talent is developing when you similar to reading. Try to choose straightforward book to make you enjoy you just read it and mingle the feeling about book and studying especially. It is to be very first opinion for you to like to open a book and learn it. Beside that the e-book Manual of Soil Laboratory Testing: Soil Classification and Compaction Tests v. 1 can to be a newly purchased friend when you're experience alone

and confuse in what must you're doing of this time.
