## Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

**From reader reviews:**

**Edward Schanz:**

The book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) can give more knowledge and information about everything you want. So why must we leave a very important thing like a book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services)? Several of you have a different opinion about reserve. But one aim that will book can give many facts for us. It is absolutely right. Right now, try to closer with the book. Knowledge or information that you take for that, you can give for each other; you are able to share all of these. Book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) has simple shape but the truth is know: it has great and massive function for you. You can appear the enormous world by open up and read a guide. So it is very wonderful.

**David Beall:**

In this period globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher this print many kinds of book. Typically the book that recommended for you is Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) this guide consist a lot of the information from the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The particular writer made some exploration when he makes this book. That is why this book appropriate all of you.

**Esther Belote:**

A lot of guide has printed but it takes a different approach. You can get it by web on social media. You can choose the best book for you, science, witty, novel, or whatever simply by searching from it. It is named of book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services). Contain your knowledge by it. Without making the printed book, it can add your knowledge and make a person happier to read. It is most important that, you must aware about reserve. It can bring you from one destination to other place.

**Andy McNeil:**

What is your hobby? Have you heard in which question when you got students? We believe that that concern was given by teacher for their students. Many kinds of hobby, All people has different hobby. And also you know that little person like reading or as reading become their hobby. You should know that reading is very

important as well as book as to be the issue. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You will find good news or update in relation to something by book. Many kinds of books that can you choose to adopt be your object. One of them is niagra Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services).
