**Inventing the Future (revised and updated edition): Postcapitalism and a World Without Work** Nick SRNICEK, Alex Williams

**A major new manifesto for a high-tech future, free from work**

Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite.

*Inventing the Future* is a bold new manifesto for life *after* capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms.

This new edition includes a new chapter where they respond to their various critics.
