Security for Web Developers: Using JavaScript, HTML, and CSS John Paul Mueller

As a web developer, you may not want to spend time making your web app secure, but it definitely comes with the territory. This practical guide provides you with the latest information on how to thwart security threats at several levels, including new areas such as microservices. You'll learn how to help protect your app no matter where it runs, from the latest smartphone to an older desktop, and everything in between.

Author John Paul Mueller delivers specific advice as well as several security programming examples for developers with a good knowledge of CSS3, HTML5, and JavaScript. In five separate sections, this book shows you how to protect against viruses, DDoS attacks, security breaches, and other nasty intrusions.

- Create a security plan for your organization that takes the latest devices and user needs into account
- Develop secure interfaces, and safely incorporate third-party code from libraries, APIs, and microservices
- Use sandboxing techniques, in-house and third-party testing techniques, and learn to think like a hacker
- Implement a maintenance cycle by determining when and how to update your application software
- Learn techniques for efficiently tracking security threats as well as training requirements that your organization can use

From reader reviews:

Patrick Lyon:

Have you spare time to get a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a walk, shopping, or went to the Mall. How about open or even read a book allowed Security for Web Developers: Using JavaScript, HTML, and CSS? Maybe it is being best activity for you. You realize beside you can spend your time with your favorite's book, you can better than before. Do you agree with it has the opinion or you have different opinion?

Eric Totten:

What do you with regards to book? It is not important with you? Or just adding material when you want something to explain what your own problem? How about your spare time? Or are you busy man? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Every individual has many questions above. They must answer that question because just their can do which. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this Security for Web Developers: Using JavaScript, HTML, and CSS to read.

Lisa Saxon:

People live in this new time of lifestyle always try to and must have the free time or they will get lot of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading textbooks. It can be your alternative within spending your spare time, the particular book you have read is definitely Security for Web Developers: Using JavaScript, HTML, and CSS.

Robert Marshall:

In this time globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Often the book that recommended for you is Security for Web Developers: Using JavaScript, HTML, and CSS this guide consist a lot of the information from the condition of this world now. This kind of book was represented how does the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some investigation when he makes this book. Honestly, that is why this book acceptable all of you.
