Orthodox Constructions of the West (Orthodox Christianity and Contemporary Thought (FUP))

It has functioned as an absolute marker of difference from what is considered to be the essence of Orthodoxy, and, thus, ironically, has become a constitutive aspect of the modern Orthodox self. The essays collected in this volume examines the many factors that contributed to the "Eastern" construction of the "West" in order to understand why the "West" is so important to the Eastern Christian's sense of self.
