Safety Systems Reliability

A. E. Green

Safety Systems Reliability A. E. Green

Examines the safety and reliability of automatic protective systems from the initial design phase through complete operation of the system within the plant. Focuses on the protective system used in nuclear reactors. Discusses the importance of independent safety and reliability assessments for evaluation of the system. Examines how human influence factors affect reliability. Compares the accuracy of the reliability prediction for characteristics such as the failure rate of equipment with actual field operating data.
