Mapping of Land Use System, Degradation & Sustainable Land Management: Assessing Impacts on Ecosystem Services in Ciwidey Sub Watershed in West Java Cinzia De Maddalena

Indonesia is a developing country that is threatened by considerable pressure of population, land conversion and economic growth. Consequently, this leads to overexploitation of soil and water resources, what results in degradation of ecosystems. The cultivation of steep mountainous areas and increased soil erosion is a consequence. There is an alarming rate of soil erosion in the Ciwidey sub watershed which is part of the upper Citarum watershed in West Java. The goal of this research thesis is to map the prevailing land use systems, land degradation and conservation in Ciwidey sub watershed. More specifically this spatial assessment aims at examining the area- and intensity-trends of land use system, the types, cause, extent, degree, rate of land degradation, and the effectiveness of sustainable land management technologies. In addition, the impacts of land use systems on ecosystem services are to be assessed. The synthesis of the obtained information and field observation leads to define hot spots of degrading and bright spots of conserved areas. Based on the gained knowledge and generated maps further planning of initiatives and decision making towards sustainable land management can be supported.

From reader reviews:

Mary Rohe:

In this 21st century, people become competitive in each way. By being competitive today, people have to do something to make all of them survive, being in the middle of typically the crowded place and notice through surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading an e-book your ability to survive increases then having a chance to stand up than others is high. To suit your needs who want to start reading the book, we give you this Mapping of Land Use System, Degradation & Sustainable Land Management: Assessing Impacts on Ecosystem Services in Ciwidey Sub Watershed in West Java book as a beginning and daily reading e-book. Why, because this book is usually more than just a book.

Jenny Davis:

Nowadays people who live in the era where everything is reachable by interacting with the internet and the resources included can be true or not demand people to be aware of each fact they get. How do people have to be smart in acquiring any information nowadays? Of course the solution is reading a book. Studying a book can help persons out of this uncertainty. Information especially this Mapping of Land Use System, Degradation & Sustainable Land Management: Assessing Impacts on Ecosystem Services in Ciwidey Sub Watershed in West Java book because this book offers you rich facts and knowledge. Of course the details in this book 100% guarantee there is no doubt in it you know.

Ruby Guillen:

The reason why? Because this Mapping of Land Use System, Degradation & Sustainable Land Management: Assessing Impacts on Ecosystem Services in Ciwidey Sub Watershed in West Java is an extraordinary book that the inside of the book is waiting for you to snap it but later it will zap you with the secret inside. Reading this book adjacent to it was a fantastic author who also wrote the book in such a remarkable way makes the content on the inside easier to understand, an entertaining way but still conveys the meaning thoroughly. So, it is good for you for not hesitating having this any more or you going to regret it. This book will give you a lot of advantages than the other book includes such as help improving your skill and your critical thinking means. So, still want to hold off having that book? If I had been you I will go to the guide store hurriedly.

Joseph Whitely:

What is your hobby? Have you heard that question when you got students? We believe that that question was given by a teacher to their students. Many kinds of hobby, all people have different hobbies. And you also know that little person just like reading or as looking at become their hobby. You should know that reading is very important as well as a book as to be the thing. A book is an important thing to incorporate your knowledge, except your own teacher or lecturer. You find good news or updates regarding something by book. Many kinds of

books that can you choose to use be your object. One of them is actually Mapping of Land Use System, Degradation & Sustainable Land Management: Assessing Impacts on Ecosystem Services in Ciwidey Sub Watershed in West Java.
