Programming with MATLAB 2016 Huei-Huang Lee

This book is designed for undergraduate students, completely new to programming with MATLAB. Case studies and examples are used extensively throughout this book and are at the core of what makes this book so unique. The author believes that the best way to learn MATLAB is to study programs written by experienced programmers and that the quality of these example programs determines the quality of the book. The examples in this book are carefully designed to teach you MATLAB programming as well as to inspire within you your own problem solving potential. Most of the examples used in this book are designed to solve a whole class of problems, rather than a single, specific problem.

A learn by doing teaching approach is used all through the book. You are guided to tackle a problem using MATLAB commands first and then the commands are explained line by line. This process of learning through hands on experience is one of the most efficient and pain-free ways of learning MATLAB. This approach, together with the extensive use of ordered textboxes, figures, and tables, greatly reduces the size of the book, while still providing you with a book that is comprehensive and easy to follow.

The first chapter of this book introduces the MATLAB programming environment and familiarizes you with MATLAB's core functionality. Chapters two through nine discuss basic MATLAB functionalities in a progressive and comprehensive way. The chapters start out simple and build in complexity as you advance through the book. Chapters ten through thirteen cover advanced topics that are particularly useful in college programs. Each chapter consists of sections, each covering a topic and providing one or more examples. Related MATLAB functions are organized at the end of a section. Additional exercise problems are provided at the end of chapters two through nine.

Examples in each section are presented in a consistent way. An example is usually described first, followed by a MATLAB script. Any resulting text and graphics output (and in some cases inputs) that are produced from running a script are presented and discussed. Finally, the remainder of each section is devoted to explaining the purpose of the lines of the script.

Table of Contents

1. Getting Started, Overview, and Environment
2. Data Types, Operators, and Expressions
3. Flow Controls, Functions, and Programs
4. Cell Arrays, Structures, Tables, and User-defined Classes
5. Data Visualization: Plots
6. Animations, Images, Audios, and Videos
7. Data Import and Export
8. Graphical User Interfaces
9. Symbolic Mathematics
10. Linear Algebra, Polynomial, Curve Fitting, and Interpolation
11. Differentiation, Integration, and Differential Equations
12. Nonlinear Equations and Optimization
13. Statistics

From reader reviews:

Robert Thomas:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim as well as goal; it means that reserve has different type. Some people truly feel enjoy to spend their time for you to read a book. These are reading whatever they have because their hobby is actually reading a book. What about the person who don't like examining a book? Sometime, man feel need book after they found difficult problem or even exercise. Well, probably you will want this Programming with MATLAB 2016.

Emma Lavigne:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, what best subject for that? Merely you can be answered for that question above. Every person has distinct personality and hobby for every other. Don't to be compelled someone or something that they don't wish do that. You must know how great and also important the book Programming with MATLAB 2016. All type of book can you see on many resources. You can look for the internet sources or other social media.

Paul England:

What do you in relation to book? It is not important to you? Or just adding material when you really need something to explain what the one you have problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They must answer that question since just their can do that will. It said that about book. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need this particular Programming with MATLAB 2016 to read.

Cindy Mattis:

In this period globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is Programming with MATLAB 2016 this publication consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The words styles that writer use for explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book appropriate all of you.
